August 10, 2007, Cluj Napoca, Romania (European Union)

exosyphen studios releases WiFi Monitor for the Windows Mobile PocketPCs. PocketPC WiFi Monitor is a small utility tool that allows you to quickly scan for wireless networks around you, and display useful information about them.

Features:

- Detailed network info: SSID, signal strength, channel, type and security
- Ability to filter displayed networks (hide secure networks and peers)
- Sound alerts, when a new network is found
- Updates are completely free, for lifetime, for this software.
- Redownload your software anytime you wish, completely free, for lifetime.

WiFi Monitor Pricing and Availability

WiFi Monitor works on any Windows Mobile PocketPC (ARM CPU) and costs \$4.99(USD). Additional information, as well as a free demo version, are available at <http://www.exosyphenstudios.com/>

About exosyphen studios

exosyphen studios was founded in 2003 and focuses primarily on game development, established in Romania (inside the European Union), author of several successful games and software titles.
