

## exoVirusStop user manual

Protect your Symbian Series 60 mobile phone and data, against malicious files and viruses, with the highly recognized product, developed by exosyphen studios. exoVirusStop has been designed with simplicity and efficiency in mind. You will be amazed by the small amount of memory it requires, and it's lightning fast scanning engine.

After you start exoVirusStop, select the Options menu. It has the following options:

**Scan phone:** Performs a complete scan of your device. Any viruses or malicious files that are found will be cleaned and removed.

**About:** Displays information about the product.

**Check for updates:** Allows you to check for updates and install them. An internet connection is required for this operation. The estimated data traffic volume used for this operation is 50Kb. A valid serial number and subscription are required in order to be able to download updates.

**Exit:** Exit the antivirus.

If you wish to leave exoVirusStop active in the background, just switch away from it, using the Symbian/Menu key.
